

FIRECHIEF LITHIUM BATTERY FIRE RESISTANT CONTAINER

Designed for safe storage and transit of Lithium-ion battery packs, fireworks and flammable chemicals

FIRECHIEF®
making the world a safer place

LITHIUM-ION

BATTERY SAFETY RANGE

MODEL:

FRC/AVD

Features

- Insulates and isolates to contain / prevent the spread of fire and heat
- Acts as a thermal shield – reduces the threat of ignition from thermal conductivity
- Flame arrestors included
- 300 mm x 250 mm x 250 mm
- Other sizes available

FRC/AVD
141-1041

FIRECHIEF®

making the world a safer place

FIRECHIEF LITHIUM BATTERY FIRE RESISTANT CONTAINER

The Firechief Lith-ex Fire Resistant Container (FRC) is an innovative product that protects potentially flammable goods against the threat of fire. The exceptional insulation properties are achieved by the use of a unique combination of technical textiles which prevent the propagation of both internal and external fires.

The Fire Resistant Container provides the perfect solution for transporting and storing potentially combustible products, such as batteries, fireworks and other flammable chemicals.

The FRC works in several ways:

- Contains a fire within the bag (e.g. burning batteries on a plane)
- Prevents fire spreading to adjacent material
- Gives extra time for responders to get the risk under control or people to escape
- Prevents an external fire igniting a vulnerable/flammable cargo

The Firechief Lith-Ex range also includes specialist Extinguishers and Fire Blankets. Please contact us for details.

MODEL:
FRC/AVD

Model Number	FRC/AVD
Product Code	141-1041
Dimensions (mm)	300 x 250 x 250
