

The **BS1940 BATTERY COMMANDER PRO SERIES** is also available with the versatile internal locker configurations shown above, providing a secure and practical solution for the safe storage and charging of lithium-ion batteries.

- **LOCKERS** – The **BS1943** model is supplied with four internal lockers. The **BS1945** features seven internal lockers. The largest unit in the range, the **BS1946**, is fitted with fourteen internal lockers.
- **LOCKING** – As standard, each individual locker is fitted with a high-quality key lock, with the option to upgrade this to a fully featured electronic lock with features such as public or private, audit trail and illuminated keypad and display.
- **CHARGING** – To support safe battery charging, every locker compartment is equipped with two internal plug sockets, allowing devices and lithium-ion batteries to be securely stored and charged simultaneously.

LOCKER FEATURES

- 4, 7 or 14 internal lockers.
- Each locker equipped with two internal plug sockets.
- Standard key locking with electronic option.
